

NECESSARY EQUIPMENT

As a 1099 contractor, you are in business for yourself and will need to provide your own equipment in the workspace that you've selected to perform work duties.

For most clients, this includes the basics:

- Laptop or desktop PC (we recommend an i5, i7 or i9 processor, and 16gb of RAM)
- Monitor if using a laptop, such as a 22" flat screen monitor
- Wired keyboard and mouse if using a flat screen monitor
- Wired or wireless headset
- WiFi connection with speeds over 25 Mbps downloads and 3 Mbps uploads
 - *Clients requiring video conferencing or cloud syncing may require 100 Mbps*
- Ethernet to USB adapter

To help you get everything you need to be successful and start earning money as quickly as possible, we will provide you with a list & links to recommended products and where to purchase them. Please check with the client **first** to ensure you meet the equipment requirements for any job you select.
